Homicides d'hommes par partenaire intime et ex	6	7	4	6	5
Suicides auteurs hommes	4	1	2	2	4
Suicide auteures femmes	0	1	0	0	0

### **3> Commentaires :**

**3.1>** The Finnish Home Monitoring System (FHMS) has collected information on homicides since June 2002. It is maintained jointly by the National Research Institute of Legal Policy, the Police Department of the Ministry of the Interior, and the Finnish Police College. The aim of the FHMS is to monitor the homicide phenomenon, to create a data-basis for in-depth research, and to serve crime prevention and prevention targeting purposes.

**3.2>** Based on police investigation. The FHMS database is based on the police data, ie, information produced during preliminary investigations. The data are collected directly from the chief investigator of each individual homicide on a standard electronic form. It is compulsory for the investigating officers to fill in the questionnaire. The general crime reporting system of the police is used as a control and follow-up instrument to make sure that the data are acquired from all registered homicides.
